Category: Jute Yarn

Jute Yarn

Jute Yarn's natural properties and affordability make it a popular choice for a wide range of applications, particularly those where its strength and coarse texture are advantageous. Their eco-friendly characteristic also contributes to its appeal in industries and crafts that value sustainability.

Below is a detailed description of the types of Jute Yarn and Jute Twine we manufacture:

Count: 6 Lbs – 32 lbs

Ply: Single to 3 ply

Yarn Quality: Sacking, Hessian, CB, CRM, CRT, CRX .

Spool: Precision Conical Paper/Wooden Spool, Parallel Paper Spool, Coreless Spool, Yarn Ball & Hanks.

Weight: 100 gm, 250 gm, 500 gm, 1 kgs up to 20 kgs Spool & Yarn Ball .

Packing: Export Standard Pallet, Truss & Cartoons.

JUTE YARN HANKS

Jute yarn hanks are bundles or coils of jute yarn, a natural fiber yarn produced from the jute plant. They are commonly used in various applications, including agriculture, garment production, gardening, and even decorative arts. The yarn is spun from the jute fiber and then collected in hanks for easier handling and storage.

Jute Rope

Jute Rope is a type of rope made from Jute Yarn which extracted from natural jute fibers, which are derived from the jute plant (*Corchorus Olitorius* and *Corchorus Capsularis*) and Jute Rope commonly used for various purposes.

Despite its many advantages, Jute Rope does have some limitations. It may deteriorate more quickly when exposed to moisture and sunlight compared to synthetic ropes. Additionally, it can be prone to fraying if not properly maintained. Overall, jute rope is a versatile and environmentally friendly option for various purposes, valued for its strength, natural appearance, and affordability. Different type of Jute Rope 1, 3 & 4 Stands Hard Twist and Medium Twist we produce.

Diameter: 4 mm - 50 mm

Quality: Sacking, Hessian, CB, CRT

Coil Weight: 5 KGS up to 50 KGS

Packaging Details

Each Coil Wrapped with Poly then wrapped with a Hessian Bag

Material: 100% Tossa Jute.

Jute Sliver / Kenaf / Mesta Sliver

Jute sliver, also known as jute silver or simply sliver, is a term used in the jute industry to refer to a semi-processed form of jute Fiber. It's an intermediate stage in the jute manufacturing process before the Fibers are spun into yarn or further processed into various jute products.

Quality: Long Fiber & Cut Fiber Meshta White A,B,C & Tossa BTE,BTC, BTD Golden Yellow & BTCB.

Packing : 13 kgs each roll to be tied by 4 Jute ropes to avoid break down of rolls and 3 rolls to be packed by Hessian bag or Pallet packing 72 roll per pallet & cut fiber packing bales wrapped with Jute rope.

Moisture Content: 16% Maximum

Environment Aspects

We are well aware of the current demand for a clean and carbon-free environment.

We have taken all measures to keep our surroundings free from industrial pollutions. We are trying to go green as much as possible.

Why We Are Unique & Reliable?

Competitive Price

Quality Assurance
Guarantee

Experience Team

Committed to
Timely Shipments

The Green Initiative

Jute Bags are bio-degradable and compostable. Jute fiber is 100% biodegradable and recyclable, and thus environmentally friendly. A hectare of Jute plants consume about 15 tons of carbon dioxide and releases 11 tons of oxygen.

Cultivating Jute in crop rotations enhances the fertility of the soil for the next crop. Jute also does not generate toxic gases when burnt.

In today's context, Jute as well as eco-friendly jute bags, are the most substitute solution for the pollution-free Eco-friendly environment. It is a natural fiber that is the most Eco-accommodating, biodegradable, and recyclable fiber that meets social duty and green development objectives. Over the years it has gained enormous importance.
